Personal Portfolio: [Muhammad Zain Ul Abideen Personal Portfolio](#)

## Summary

React Native Developer with hands-on experience building cross-platform iOS and Android applications and MERN stack applications. Skilled in UI/UX implementation, reusable components, RESTful APIs, Redux Toolkit, authentication, subscriptions, push notifications, Redis caching, background jobs, and third-party APIs. Built and published an offline-first mobile app and a full-stack personal growth platform using Node.js, Express.js, MongoDB, Stripe, Firebase, and Google Gemini API. Currently pursuing Masters in Computer Science.

## Technical Skills

**Mobile:** React Native, iOS, Android, Reusable UI Components, Offline-First Mobile Development, Push Notifications, Firebase Cloud Messaging (FCM)

**Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Responsive Design, Redux, Redux Toolkit, Tailwindcss

**Backend:** Node.js, Express.js, RESTful APIs, JWT Authentication, Centralized Error Handling, Cron Jobs

**Databases & Caching:** MongoDB, Redis, Data Modeling and Schema Design

**Integrations:** Stripe Billing, Stripe Webhooks, Firebase Admin SDK, Google Gemini API

**Tools:** Git, GitHub, Postman, VS Code

## Projects

### WhiteBear: Full-Stack Personal Growth App

**Tech:** React Native, Redux Toolkit, Node.js, Express.js, MongoDB, Redis, Stripe, Firebase, Google Gemini

- Built a cross-platform mobile platform for habit tracking, goal milestones, secure journaling, and to-do management.
- Integrated Google Gemini API for personalized self-improvement feedback and implemented tiered Stripe subscriptions with server-side webhook verification.
- Delivered real-time push notifications with Firebase Admin SDK (FCM), plus Redis caching and scheduled background jobs for usage analytics.

## **Nova Notes: Offline-First Notes and Task App**

**Tech:** React Native, Redux, Redux Toolkit

- Designed and published a fully offline mobile app for task management and daily notes.
- Managed application state with Redux Toolkit to keep data flow predictable and reduce unnecessary re-renders.
- Built lightweight custom UI components that continue to work without a network connection.

## **Experience**

### **Mobile Application Developer | Spark Solutionz, Sargodha, Pakistan (On-Site)**

July 2026 - Present

- Build responsive React Native screens from UI/UX wireframes for consistent iOS and Android experiences.
- Integrate RESTful APIs with backend services and handle loading, error, and empty states in mobile workflows.
- Manage app state with Redux, contribute to code reviews, and support sprint delivery, debugging, and bug fixes using Git.

### **React Native Developer | Kreative Nomads, Lahore, Pakistan (Remote)**

September 2024 - February 2025

- Built 10+ reusable cross-platform UI components, reducing new-screen development time by about 20%.
- Converted complex UI/UX wireframes into responsive React Native interfaces for iOS and Android.
- Integrated RESTful APIs with backend services and improved application data-loading flows.
- Organized application state with Redux to keep data flow predictable across remote development sprints.

### **MERN Stack Intern | Techup-24, Rawalpindi, Pakistan (On-Site)**

June 2024 - August 2024

- Built responsive, cross-browser interfaces with React.js for full-stack web applications.
- Developed, tested, and maintained RESTful APIs using Node.js and Express.js.
- Created reusable frontend components to accelerate delivery of new application features.
- Designed MongoDB schemas and managed application data for dynamic full-stack features.

## **Education**

**Master of Science in Computer Science (MSCS)** | University of Sargodha, Pakistan | 2024 - Present

**Bachelor of Science in Computer Science (BSCS)** | University of Sargodha, Pakistan | 2018 - 2022
